Job Vacancy: Data Scientist & ML Engineer

Position Overview:
We are an AI-based startup in Amsterdam seeking a skilled and motivated Data Scientist and ML Engineer to join our Data Science Team. The role is **part time** (2-3 days per week) and mainly consists of training predictive models for food components in plants. Communication with the plant physiology and business teams will be required to ensure alignment in tasks.

Key Responsibilities:
- Process and analyse tabular data to derive meaningful insights.
- Develop and implement machine learning models for classification and regression tasks.
- Utilize cutting-edge image segmentation models for advanced data analysis.
- Perform exploratory data analysis on diverse data sets to uncover trends, patterns, and correlations.
- Study and work with generative models to develop synthetic datasets

Requirements:
- Bachelor's degree or higher in Artificial Intelligence, Data Science, Mathematics, Computer Science, or another relevant field.
- Proficiency in Python
- Hands on experience with standard ML libraries (Pytorch, Pandas, Scikit-Learn etc)
- Solid understanding of mathematical concepts related to machine learning and statistics.
- Availability to work from our offices in Amsterdam.

Important Qualifications:
- A true team player
- Hands-on experience in Computer Vision projects.
- Experience with cloud computing (MS Azure)
- Problem-solving skills and attention to detail
- Communication skills and cooperative attitude
- Previous experience with plant science or life science is a big plus.

How to Apply:
Interested candidates should submit their resume, to info@grwnxt.com
Please include "Data Scientist & AI Application" in the subject line.
